A close-up photograph of a guitar's headstock and neck, resting on a black metal guitar stand. The stand has the brand name 'QUIKLOK' printed in white, bold, sans-serif capital letters on its top horizontal bar. The guitar has a light-colored wood body and a dark fretboard. The background is blurred, showing a wooden surface and a red object. A small red square is located in the top right corner of the image.

GS/500 SERIES OF UNIVERSAL GUITAR STANDS WITH SELF-LOCKING YOKE

- Quik Lok introduces the new GS/500 Series of universal guitar stands, combining the elegance of a contemporary design with an ingenious device (patent-pending) that allows for a secure and well balanced support of any size electric/acoustic guitar and bass.
- When the guitar is placed into the stand yoke, the instrument's weight will automatically drive the lateral safety barriers incorporated in the yoke to engage. The safety barriers turn down to lock the guitar neck securely in place, preventing the instrument from accidentally falling off the stand. When the guitar is lifted from the stand the security barriers will simultaneously turn back to their original position to free the instrument.
- Durable, smooth rubberized padding on yoke protects guitars from scratches and will not mar finish.
- The neck holder height can be easily adjusted to multiple positions to accommodate any size guitar.
- The guitar body rests comfortably and safely against metal supports that are adequately covered with velveteen foam cushioning to protect and avoid marring the guitar finish.
- Collapsible neck allows to fold the stand to a slender shape for easy storage and transport.
- The GS/500 Series comprises three floor stand models, for one, two and three electric/acoustic or bass guitars.

Collapsible neck allows to fold the stand to a slender shape for easy storage and transport.
